Table S1	2
FigureS1.....	130

Introduction

Table S1 contains data on sedimentation rates from over one thousand locations, indicating the procedure used to obtain them, comments on uncertainties and references to information sources.

Figure S1 presents in graphic form and for the three periods considered, the results obtained in the five countries/regions analyzed, grouped by sedimentation environments as well as by geographical areas (unweighted averages). A total of 119 groups of data.

Supplementary Table. Summary of the results on sedimentation rates obtained from the literature (complete references included at the end). A graphic representation of these data, is available at <http://hdl.handle.net/10902/11396>. Results, grouped by both sedimentation environments and geographical regions in each one of the study areas, in Supplementary Figure 1.

CHINA

Lakes and karst depressions
