Supplementary Table 2. Serum proteins identified in serum samples from Adélie Penguin (*P. adeliae*) ($n_{HDZ} = 4$ and $n_{LDZ} = 4$) from both zones (HDZ and LDZ). Peptides matching with Chordata database (Uniprot) are listed and total score is reported, including protein names. These proteins displayed a significant threshold value of $P < 0.05$ and a peptide cut-off score of 20. Score represents the sum of the individual peptide scores. Proteins that showed a differential expression level between zones (HDZ and LDZ) are listed first and highlighted in bold.
