On-line Resource 1. Total number of zooplankton taxa at each sampling site during the four hydrologic conditions, and number of cumulative species per site considering all surveys.

	Canal 1	Canal 2	Canal 3	Stream	River 2	River 1
High water	63	68	-	38	42	41
Mean flows	52	69	-	33	68	42
Low flows	48	58	54	47	51	38
Very low flows in the tributaries with mean flows in the river	53	26	47	32	51	51
<i>Number of cumulative species</i>	<i>105</i>	<i>110</i>	<i>75</i>	<i>77</i>	<i>101</i>	<i>87</i>
