

## The Types of Aphelinidae and Signiphoridae (Hymenoptera: Chalcidoidea) Housed at the Museo de La Plata, Argentina

**LOIÁCONO, Marta S., Fabiana E. GALLARDO and Cecilia B. MARGARÍA**

División Entomología, Museo de La Plata, Paseo del Bosque, B1900DNG, La Plata, Argentina;

e-mail: loiacono@museo.fcnym.unlp.edu.ar

■ **ABSTRACT.** The 293 type specimens of Aphelinidae and 24 Signiphoridae (Chalcidoidea) housed at the Museo de La Plata (División Entomología) were examined and listed, providing update information on categories of types, data of collection and host. The types belong to 30 species and two subspecies of Aphelinidae described by the following authors: Annecke & Insley (1), Blanchard (2), Compere (4), De Bach & Rosen (1), De Santis (21), and De Santis & Vidal Sarmiento de Regalía (1); and nine species of Signiphoridae described by the following authors: De Santis (6) and Kerrich (3).

**KEY WORDS.** Catalogue. Type material. Aphelinidae. Signiphoridae. Museo de La Plata Collection.

■ **RESUMEN. Los tipos de Aphelinidae y Signiphoridae (Hymenoptera: Chalcidoidea) depositados en el Museo de La Plata, Argentina.** Fueron examinados y listados los 293 tipos de Aphelinidae y 24 de Signiphoridae depositados en el Museo de La Plata (División Entomología), para cada taxón se brinda la información actualizada acerca de los materiales tipo, datos de recolección y huéspedes. Estos tipos pertenecen a 30 especies y dos subespecies de Aphelinidae descriptas por los siguientes autores: Annecke & Insley (1), Blanchard (2), Compere (4), De Bach & Rosen (1), De Santis (21), y De Santis & Vidal Sarmiento de Regalía (1); y nueve especies de Signiphoridae descriptas por los siguientes autores: De Santis (6) y Kerrich (3).

**PALABRAS CLAVE.** Catálogo. Tipos entomológicos. Aphelinidae. Signiphoridae. Colección Museo de La Plata.

### INTRODUCTION

Aphelinidae is currently divided into five subfamilies: Aphelininae, Azotinae, Calesinae, Coccophaginae, and Eriaporinae (Hanson, 1995). The majority of aphelinids species belong to the Aphelininae and Coccophaginae. Azotinae may be situated between these too large subfamilies (Polaszek & Hayat, 1992) or it may be the sister group to the Signiphoridae (Woolley, 1988). According to Martín-Piera & Lobo (2000) 1120 species of Aphelinidae have been described; 72 species have been recorded by De Santis (1998) for Argentina. Greathead (1986) emphasize that the Family Aphelinidae has been more successful in

classical biological control (importations) than any other group of entomophagous insects. The majority of aphelinids are parasitoids of ninphal stages of sternorrhynchous "Homoptera", especially of scale insects (Coccoidea), whiteflies (Aleyrodoidea) and aphids (Aphidoidea). Most aphelinids are primary parasitoids, but species of *Ablerus*, *Azotus* and *Centrodora* are often hyperparasitic. *Marietta* is always hyperparasitic. Most of the primary parasitoids except the genus *Aphytis* are endoparasitic, whereas many hyperparasitic aphelinids are ectoparasitoids.

The Signiphoridae (previously called the Thysanidae) is a small family containing about one hundred species gathered in four genera

(Woolley, 1988). It is a cosmopolitan group that is most species-rich in the Neotropical region. The Signiphoridae appears to be related to the Aphelinidae and a sister-group relationship between it and Azotinae aphelinids is suggested by at least one synapomorphy. According to Martín-Piera & Lobo (2000) 80 species of Signiphoridae have been described; 16 are recorded for Argentina (De Santis, 1998). Signiphoridae have rarely been used in classical biological control, probably because many of these species are obligate hyperparasitoids. They are most commonly parasitoids of sternorrhynchous "Homoptera", especially scale-insects (Coccoidea) and white flies (Aleyrodidae), but also Aphidoidea and Psylloidea. Other signiphoridae are known to parasitize larvae or pupae of Diptera, especially those that are in some way associated with these homopterans. Most signiphoridae are thought to be solitary endoparasitoids but at least some species of *Signiphora* at least complete development as ectoparasitoids.

## MATERIAL AND METHODS

The entomological collection of the Museo de La Plata houses 293 type specimens of Aphelinidae and 24 of Signiphoridae as a result of taxonomic studies done by several entomologists. The types herein treated belong to 30 species and two subspecies of Aphelinidae described by the following authors: Annecke & Insley (1), Blanchard (2), Compere (4), De Bach & Rosen (1), De Santis (21), and De Santis & Vidal Sarmiento de Regalía (1); and nine species of Signiphoridae described by the following authors: De Santis (6) and Kerrich (3). We have listed holotypes and syntypes and also paratypes, as it has been recommended by Lavett Smith & Buerkli (1969).

Information on the specimens has been taken from labels and were compared to original descriptions. References for these descriptions were located with the help of catalogues published by De Santis (1967, 1979b, 1981a, 1989) and De Santis & Fidalgo (1994).

The following information is provided for each type specimen:

**Species names.** They correspond to the original combination (basonym) that accompanies original descriptions.

## Bibliographic reference of original publica-

**tion.** Year, author/s, journal, volumen, and page number/s.

**Type material.** Categories of holotype, allotype, syntype, and/or paratype; number of specimens, sex when it is known; collection number. All specimens of the same series have received the same collection number, each one separated by a slash with an order number. The great number of material are mounted on microscopic slides, pinned material are indicated by "P".

**Collection data.** Country, province or state, locality, date of collection, collector's name.

**Observations.** Host or other bionomic data included on labels.

## RESULTS

### APHELINIDAE

#### APHELININAE

*citrinus*, Aphytis Compere

1955. *Univ. Calif. Publ. ent.* 10: 312.

- Syntypes (16), females, MLP no. 2012/1.  
UNITED STATES OF AMERICA: California, Tulare County, Visalia.  
20-XII-1948, Hemphill coll.

**Observations:** Obtained from *Aonidiella citrina* (Hemiptera: Diaspididae) on orange. The microscopic slide is labelled as "cotypes", here are considered as syntypes (ICZN, art. 73.2.1)

*dubius*, Aphytis De Santis

1948a. *Rev. Mus. La Plata zool.* 5 (32): 126.

- Holotype, female, MLP no. 2010/1.  
ARGENTINA: Río Negro, Fuerte General Roca.  
VI-1937, Santos coll.
- Paratypes (3), females, MLP no. 2010/2-4.  
Same data as holotype.
- Paratype, female, MLP no. 2010/5.  
ARGENTINA: Santa Fe, Angel Gallardo.  
VIII-1938, Griot coll.

**Observations:** Reared from *Quadraspisidiotus perniciosus* (Hemiptera: Diaspididae) on *Malus sylvestris* (Rosaceae). The microscopic slide no. 2010/1 is labelled as holotype but the author did not design it in the original publication. According to art. 72.4.1.1 (ICZN) we considered it as the holotype.

*dubius intermedia*, Aphytis De Santis

1948a. *Rev. Mus. La Plata zool.* 5 (32): 129.

- Holotype, female, MLP no. 2011/1.

ARGENTINA: Buenos Aires, Patagones.

VI-1938, De Santis coll.

**Observations:** Reared from *Aspidiotus hederae* (Hemiptera: Diaspididae) on *Olea europaea* (Oleaceae). In the original publication the date is VII-1938. The microscopic slide no. 2011/1 is labelled as holotype but the author did not design it in the original publication. According to art. 72.4.1.1 (ICZN) we considered it as the holotype.

*lepidosaphes*, *Aphytis* Compere

1955. *Univ. Calif. Publ. ent.* 10: 307.

- Syntypes (40), sex not determined, MLP no. 2013/1.

CHINA REPUBLIC: Formosa

XII-1950, collector unknown.

**Observations:** Propagated C.E.S. Insectarium, original stock from Formosa, China Republic; from *Lepidosaphes beeckii* (Hemiptera: Diaspididae) on citron melon. The microscopic slide no. 2013/1 is labelled as "cotypes", here are considered as syntypes (ICZN, art. 73.2.1).

*lingnanensis*, *Aphytis* Compere

1955. *Univ. Calif. Publ. ent.* 10: 303.

- Syntypes (19), sex not determined, MLP 2009/1. UNITED STATES OF AMERICA: California, River Side.
- 30-VII-1953, Caltagirone coll.

**Observations:** Propagated C.E.S. Insectarium. The microscopic slide no. 2009/1 is labelled as "cotypes", here are considered as syntypes (ICZN, art. 73.2.1)

*melanostictus*, *Aphytis* Compere

1955. *Univ. Calif. Publ. ent.* 10: 287.

- Paratypes (27), males and females, MLP 2014/1. UNITED STATES OF AMERICA: California, River Side.
- 15-III-1936, Flanders coll.

**Observations:** Obtained from *Aspidiotus juglans regiae* (Hemiptera: Diaspididae) on walnuts. The author designed holotype and paratypes in the original publication, the microscopic slide no. 2014/1 is labelled as "cotypes", here are considered as paratypes (ICZN, art. 73E).

*notialis*, *Aphytis* De Santis

1965. *Rev. Soc. Entomol. Argent.* 27 (1-4): 75.

- Holotype, female, MLP no. 2032/1.

ARGENTINA: Buenos Aires, Castelar.

XII-1963, Crouzel coll.

- Allotype, male, MLP no. 2032/2.

CHILE: Santiago de Chile.

19-II-1953, Kuschel coll.

- Paratypes (4), males, MLP no. 2032/3-6.

Same data as holotype.

- Paratypes (4), sex not determined, MLP no. 2032/7.

Without data.

**Observations:** The microscopic slide no. 2032/6 has only an antenna.

*obscurus*, *Aphytis* De Bach et Rosen

1976. *Ann. ent. soc. amer.* 69 (3): 541.

- Paratypes (2), females, MLP no. 3964/1-2.

ARGENTINA: Buenos Aires, Isla Martín García. VIII-1971, Zimmermann coll.

- Paratype, male, MLP no. 3964/3.

Same data as paratype.

**Observations:** On *Diplacaspis echinocacti* (Hemiptera: Diaspididae).

*bella*, *Centrodora* De Santis

1953. *Rev. Fac. Agron. La Plata* 29: 80.

- Allotype, male, MLP no. 2016/1.

ARGENTINA: Buenos Aires, Eva Perón [La Plata].

11-VI-1953, Balcedo coll.

- Paratype, male, MLP no. 2016/2.

Same data as allotype.

- Paratypes (2), females, MLP no. 2016/3-4.

Same data as allotype.

- Paratype, female, MLP no. 2016/5.

Same data as allotype except 8-IV-1952.

- Paratype, female, MLP no. 2016/6.

Same data as allotype except 9-II-1953.

- Paratype, female, MLP no. 2016/7.

Same data as allotype except 9-IV-1952, Balcedo - Paes colls.

*citri*, *Debachiella* De Santis et Vidal Sarmiento de Regalía

1979. *Acta zool. lilloana* 35 (1): 395.

- Holotype, female

ARGENTINA: Corrientes.

11-X-1976, Botto coll.

**Observations:** Reared from *Aonidiella aurantii* (Hemiptera: Diaspididae).

*haywardi*, *Marietta* De Santis

1948a. *Rev. Mus. La Plata zool.* 5 (32): 146.

- Paratypes (2), females, MLP no. 3963/1-2. ARGENTINA: Entre Ríos, Concordia. 12-XI-1934, Hayward coll.
- Paratype, female, MLP no. 3963/3. Same data except 23-X-1934.

**Observations:** Host: *Lecanodiaspis* (Hemiptera: Lecanodiaspididae) on *Baccharis* (Asteraceae). The microscopic slide no. 3963/1 has only parts of the specimen.

- intermedia*, Marietta Annecke et Insley  
1972. *J. entomol. soc. south. afr.* 35 (1): 1-15.
- Paratypes (3), females, MLP no. 4066/1-3. SOUTH AFRICA: Citrusdal. X-1970, Insley coll.

**Observations:** With *Tachardina* (Hemiptera: Kerriidae) on *Struthiola dodecandra* (Thymelaeaceae).

- mireyae*, *Oolathron* De Santis  
1981. In: De Santis et al. *Rev. Mus. La Plata zool.* 12 (123): 246.
- Holotype, female, MLP no. 2696/1. ARGENTINA: Córdoba, Cruz del Eje. XII-1978, Brewer coll.
  - Paratypes (4), females, MLP no. 2696/2-5. Same data as holotype except I-1978.

**Observations:** On *Triatoma infestans* (Hemiptera: Reduviidae) eggs.

## AZOTINAE

- ciliatus*, *Ablerus* De Santis  
1948a. *Rev. Mus. La Plata zool.* 5 (32): 200.
- Holotype, female, MLP no. 2024/1. ARGENTINA: San Juan, Alto de Sierra. VII-1938, López Mansilla coll.
  - Allotype, male, MLP no. 2024/2. Same data as holotype.
  - Paratype, sex not determined, MLP no. 2024/3. Same data as holotype.

- leucopidis*, *Ablerus* Blanchard  
1942. *Rev. Soc. Entomol. Argent.* 11: 373.
- Syntypes (6), females, MLP no. 2026/1-6. ARGENTINA: Salta, Metán 1935, Koehler coll.
- Observations:** Reared from *Leucopis* sp. (Diptera: Chamaemyiidae) parasite from *Ceroplastes grandis* (Hemiptera: Coccidae). The author designed holotype in the original publication, the mi-

croscopic slide no. 2026/1 is labelled as "cotype", here are considered as paratypes (ICZN, art. 74.4.1.1).

*perfuscipennis*, *Ablerus* De Santis  
1954. *Bol. Lab. Zool. Gen. Agr. Portici* 33: 191.

- Holotype, female, MLP no. 2025/1. ARGENTINA: Chubut, Puerto Lobos. II-1951, Torres & De Santis colls.
- Allotype, male, MLP no. 2025/2. Same data as holotype.
- Paratypes (2), females, MLP no. 2025/3-4. Same data as holotype.

**Observations:** Host: *Paradiaspis lizeriana* (Hemiptera: Diaspididae).

- crassus*, *Azotus* De Santis  
1974. *Rev. chil. ent.* 8: 14.
- Holotype, female, MLP no. 3939/1. ARGENTINA: Misiones, Loreto. 15-VI-1934, Ogloblin coll.

- lepidus*, *Azotus* De Santis  
1974. *Rev. chil. ent.* 8: 13.
- Holotype, male, MLP 4011/1. ARGENTINA: Buenos Aires, La Plata. II-1938, De Santis coll.

- macilentus*, *Azotus* De Santis  
1974. *Rev. chil. ent.* 8: 14.
- Holotype, female, MLP no. 3938/1. ARGENTINA: Misiones, Loreto. 3-III-1935, Ogloblin coll.

- similis*, *Azotus* De Santis  
1948a. *Rev. Mus. La Plata zool.* 5 (32): 221.
- Holotype, female, 2027/1. ARGENTINA, San Juan, Alto de Sierra. Without date, López Mansilla coll.
- Observations:** reared from coccoids on olive from Brazil.

## COCCOPHAGINAE

- coccidis*, *Aneristus* Blanchard  
1942. *Rev. Soc. Entomol. Argent.* 11: 376.
- Syntypes (2), females, MLP no. 2021/1-2. ARGENTINA: Entre Ríos, Concordia. IV-1938, Hayward coll.

**Observations:** On *Coccus hesperidum* (Hemiptera: Coccidae). The microscopic slides are

labelled as cotypes, here are considered as syntypes (ICZN, Recommendation 73E).

*albiapicella*, *Coccophagus* De Santis

1996. *Acad. Nac. de Agron. y Vet.* 50 (12): 8.

X-1937, De Santis coll.

- Paratypes (2), females, MLP no. 2028/10.

ARGENTINA: Buenos Aires, La Plata.  
X-1943, Lopapa coll.

**Observations:** On *Quadraspidiotus perniciosus* (Hemiptera: Diaspididae). The microscopic slide no. 2028/1 is labelled as holotype and no. 2028/2-10 as paratypes, but the author did not design it in the original publication. According to art. 72.4.1.1 (ICZN) we considered it as the holotype and paratypes respectively. The collector mentioned in the label of microscopic slides 2028/1-2 is López, but in the original publication says Santos.

## SIGNIPHORIDAE

*axillaris*, *Chartocerus* De Santis

1973. Rev. Fac. Agron. La Plata 49: 152.

- Holotype, female, MLP no. 3927/1.

ARGENTINA: Mendoza, Chacras de Coria.  
25-II-1957, Exp. Mus. La Plata

**Observations:** On *Pseudococcus* sp. (Hemiptera: Pseudococcidae) on *Solanum eleagnifolium* (Solanaceae).

*coleoptratus*, *Thysanus* Kerrich

1953. Bull. ent. Res. 44: 802.

- Paratype, male, MLP no. 1931/1 (P).

TRINIDAD Y TOBAGO: Trinidad, St. Augustine.  
1-V-1949, Kirkpatrick coll.

- Paratype, female, MLP no. 1931/2.

Same data as paratype.

**Observations:** Reared from *Pseudococcus citri* (Hemiptera: Pseudococcidae) on cacao.

*frequentior*, *Thysanus* Kerrich

1953. Bull. ent. Res. 44: 803.

- Paratype, male, MLP no. 1929/1 (P).

VENEZUELA: Mérida, Tovar.  
III-1947, Box coll.

- Paratype, female, MLP no. 1929/2.

Same data as paratype.

**Observations:** Reared from *Paratheresia claripalpis* (Diptera: Tachinidae) in *Diatraea saccharalis* (Lepidoptera: Crambidae) in sugar cane.

*zostericus*, *Thysanus* Kerrich

1953. *Bull. ent. Res.* 44: 805.

- Paratype, male, MLP no. 1930/1 (P). BRAZIL: Amazonas, Santarem. X-1933, Myers coll.
- Paratype, female, MLP no. 1930/2. Same data as paratype except 1933.

**Observations:** Paratype no. 1930/1 reared from amazon fly; Paratype no. 1930/2 is hyperparasitoid of *Stomatodex*?

- Paratype, male, MLP no. 3839/3. ARGENTINA: Buenos Aires, Patagones VI-1938, De Santis coll.
- Paratypes (2), males, MLP no. 3839/4. ARGENTINA: Corrientes, General Paz. II-1947, Esquivel coll.
- Paratype, male, MLP no. 3839/5. Same data as paratype no. 3839/4 except V-1946.
- Paratype, female, MLP 3839/6. Same data as paratype no. 3839/4 except V-1946.
- Paratype, female, MLP 3839/7. Same data as paratype no. 3839/4 except X-1946.
- Paratypes (2), males, MLP no. 3839/8-9. ARGENTINA: Tucumán, Tucumán. 9-IX-1956, Terán coll.
- Paratype, male, MLP no. 3839/10. ARGENTINA: Entre Ríos, Concordia. 2-II-1940, Banfi coll.
- Paratype, male, MLP no. 3839/11. ARGENTINA: Misiones, Cerro Corá. 5-III-1934, Oglöblin coll.

**Observations:** Paratype no. 3839/3 was collected on *Aspidiotus hederae* (Hemiptera: Diaspididae) on olive; paratype no. 3839/4-7 was collected on *Crysomphalus aonidum* (Hemiptera: Coccidae); paratype no. 3839/11 was

collected on *Coccus hesperidum* (Hemiptera: Coccidae) on *Ilex paraguayensis* (Aquifoliaceae). Paratype no. 3839/10 has 2-II-1950 in the original publication.

*tumida*, *Signiphora* De Santis

1973. *Rev. Fac. Agron. La Plata* 49: 150.

- Holotype, female, MLP no. 3840/1. ARGENTINA: Buenos Aires, La Plata. XII-1961, De Santis coll.
- Allotype, male, MLP no. 3840/2. Same data as holotype.
- Paratypes (3), females, MLP no. 3840/3-5. Same data as holotype.

**Observations:** On coccids (Hemiptera: Coccoidea).

## ACKNOWLEDGEMENTS

Support from the Secretaría de Ciencia y Técnica de la Universidad Nacional de La Plata and Consejo Nacional de Investigaciones Científicas y Técnicas (Argentina) are gratefully acknowledged. We also thank Dra. Norma Diaz for her valuable comments and Ing. Sonia Suárez for technical support.
