UNESCO recommendation

"The question is no longer whether open science is a reality, but rather how everyone can contribute to and benefit from this transition."

<https://www.unesco.org/en/open-science/about>

Why open science builds peace?

Science and technology provide today and will provide us, with resources to eradicate hunger and poverty, improve healthcare, end energy injustice and achieve the rest of the UN sustainable development goals.

We will have to make a strong growth in the level of global human development.

“Restricting knowledge capital to its own circle equals the death of the philosophical spirit of an entire people and leads to intellectual impoverishment”. Albert Einstein (1948)

Sharing ideas

- Remind limits
- Think about personal reputation versus debate.
- Challenges for institutions.
- Promote peace
- Attend scientific ethics, with a global and inclusive vision
- Not only science: **there are many creative ways that help to think critically**

Helsinki Initiative
on Multilingualism

Hi!

La investigación es internacional. ¡Así nos gusta! El multilingüismo mantiene viva la investigación localmente relevante.

**Dudas y preguntas, sugerencias y sobre todo debate...
y más que nada ¡Gracias!**

**Doubts and questions, suggestions, discussion and last but
not least, thank you!**
