AGRADECIMIENTOS

Prueba irrefutable de que el tiempo vuela, acá estoy escribiendo estas palabras. Un intento de recordar a todos los que estuvieron junto a mí en estos años. Inevitablemente injusto, agradadamente difícil.

Viejo, Vieja, Kato, Rocha, como en todo en mi vida, ustedes van primero. Gracias por ser como son, por estar siempre ahí. Mi luz, mi sombra y mi espejo. Me hace la persona más afortunada que conozco el solo tenerlos. A toda mi familia. A mis abuelos que viven en mi recuerdo.

Al mariscal Ranaldi, por nuestra eterna amistad. Juano, Fofe, gracias por estar en todo momento, hasta la recta final. A todos mis amigos, de playa y diagonales, lillos y cobras, de hoy y de siempre. Por tantos días, y tantas noches. Por estar conmigo en cada estación de este viaje. En el que crucé el mundo para descubrir tanto, pero sobre todo a mí mismo.

Vale, Tere, les estaré siempre agradecido por ayudarme a dar aquellos primeros pasos, cuando hasta hablar era nuevo... but now that it is not so... I would like to express my gratitude to all the people I had the pleasure to meet and work with at CERN. It has been a pleasure for me to be part of the ATLAS community all these years, and to get involved within the SM Direct Photon and the EGamma groups. Francesca, Mark, Mike, Kerstin, Marcello, Giovanni... many thanks guys! I have learnt so much from working with you. I wish to thank Marco Delmastro, for trusting me with the co-edition of the ATLAS paper, and Thomas Koffas for sharing the bill and guiding me through it. I will be always grateful to Leonardo Carminati for the consistent confidence he placed in me and for his encouraging appreciation of my work. To Per Grafström, for our countless chats and his immutable good mood.

Dox, Matt, Olivier, Sere, David, Laugs... thanks for our great times together and for making the difference inside the CERN bubble. Kreature, i will never forget those perfect moments out of it...

¿Cómo olvidar a Javito, Jose, Carlos, Dani, Vincent, Garoé y a toda la linda tropa de Le Club? Que perdure la alegría, con esa energía que siempre «se nos va de las manos» ;)

Susanita, fue una bendición conocerte. Gracias por abrirme las puertas a tu inagotable bondad y a la casa que lograste sintiera mía.

Y volver a mi otra casa es volver a La Plata, al T-team. Al 0800 del aker, a los

BIBLIOGRAFÍA

tutoriales del Potro. Ale, Profe, Ernesto, Fran, Ceci, Nico, Jose...este grupo genial que sigue creciendo, en todo sentido. Infinitas gracias por la buena onda, por esta envidiable isla a la que viajo con una sonrisa cada día, sin excepción.

Gato, Vaskito, sin ustedes nada en esta aventura hubiera sido lo mism... bueno... simplemente no hubiera sido.

Dudo que muchos puedan expresar un agradecimiento tan sincero hacia su director de tesis. Super! por vos estoy en este camino, y por vos sigo en él «como el primer día». Gracias por tantas cosas, esas que no se aprenden en ningún libro, esas que sólo se enseñan con el ejemplo. Hoy sé que agoté mi suerte el día que la moneda cayó de tu lado...

A la música, que de tantas mágicas formas es siempre parte de mí.

A todos...

Gracias, thanks, grazie, merci!

Martín F. Tripiana
