ISTEC Vision

Be a leading force in fostering socio-economic and educational change in Ibero-America, by **creating prosperity and improving the quality of life** in the region

- Building installed capacity
- Creating communities of knowledge & practice

Research and Development (R&D)

Introducing state-of-the-art technology and educational curriculum in academic institutions is pivotal for the social, cultural and economic development of nations. The ISTEC R&D Initiative provides a vehicle for performing cutting edge research and development in a variety of disciplines. To achieve excellence, ISTEC, in collaboration with its partners, supports the transfer of

technology to develop R&D labs to enhance interaction between industry and academia in order to foster innovation, creativity and collaboration. Therefore, this initiative improves the ability for the latest technology to be applied to the resolution of problems in a variety of areas and encourages the development of solutions that have regional and local social and economic impact.

ISTEC-XILINX Academic Training Centers

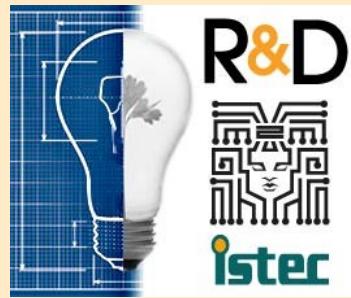

ALL PROGRAMMABLE

Through the Professional Development Series under the R&D Initiative, ISTEC has created Academic Training Centers in Latin America between 2010 and 2013. The training centers receive donations of Xilinx development boards with the purpose of creating or updating FPGA laboratories, and will work with ISTEC to build important training workshops for the use of this technology. [Read more here.](#)

- Introducción de tecnología de estado-del-arte y currículo educativo en instituciones académicas que es fundamental para el desarrollo social, cultural y económico de las Naciones.
- Proporciona un vehículo para realizar investigación y desarrollo de vanguardia en variedad de disciplinas.

- En colaboración con sus socios industriales, ISTECA, apoya la transferencia de tecnología para el desarrollo de los laboratorios I+D para mejorar la interacción entre la industria y la academia con el fin de fomentar la innovación, la creatividad y la colaboración.
- Por lo tanto, esta iniciativa facilita el acceso a las ultimas tecnologías que se requerirán en la resolución de problemas en una variedad de áreas y fomenta el desarrollo de soluciones de impacto social y económico a nivel regional y local.

Engineering Grand Challenges

Make solar energy economical

Provide energy from fusion

Develop carbon sequestration methods

Manage the nitrogen cycle

Provide access to clean water

Restore and improve urban infrastructure

Advance health informatics

Engineer better medicines

Reverse-engineer the brain

Prevent nuclear terror

Secure cyberspace

Enhance virtual reality

Advance personalized learning

Engineer the tools of scientific discovery

Welcome

This is a new interdisciplinary program that incorporates Information and Communication Technologies (ICTs) through different ISTEC Initiatives and Programs. The objective of ISTEC SALUD is to create, by means of multidisciplinary cooperative projects, a "Network of networks" in research, technology development, training and social action and assistance, with the final goal of improving health and environment. This approach will promote the well-being and raise the quality of life in the Ibero-American region, respecting the ethical, historical and cultural values of individuals and their respective communities.

PROYECTO: EL INGENIERO JOVEN Basado en el Programa de Altos Estudios Escolares en Robótica Cidiaccctec-ISTEC

Centro de Investigación Desarrollo Innovación
Asesoría y Capacitación en Ciencia y Tecnología

Centro de Investigación Desarrollo Innovación
Asesoría y Capacitación en Ciencia y Tecnología

CIDIACCTEC EN LA EDUCACION

- El centro de investigación desarrollo innovación asesoría y capacitación en ciencia y tecnología (CIDIACCTEC) con mas 8 años en temas de investigación en Electrónica Informática y Mecatrónica
- Educación de Pregrado a nivel de I+D+I

Centro de Investigación Desarrollo Innovación
Asesoría y Capacitación en Ciencia y Tecnología

CIDIACCTEC EN LA EDUCACION

- Educación básica escolar a los niños, futuros ingenieros, licenciados, del Perú (Ibero-america)
 - Introduce nuevos conceptos de tecnología
 - Con el fin de introducirlo en el mundo de la Investigación y Desarrollo
 - Presenta el programa de altos estudios escolares en robótica como complemento a las ciencias básicas aplicadas en el colegio y como preparación para futuros investigadores y desarrolladores que dominen herramientas tecnológicas modernas.

YA NO USAMOS LOS PARQUES

SOBRE LA EDUCACIÓN

- ✓ PROGRAMA DE ESTIMULACION TEMPRANA
- ✓ PROGRAMA DE ROBOTICA EDUCATIVA PARA ESTUDIANTES DE PRIMARIA
- ✓ PROGRAMA DE ROBOTICA EDUCATIVA PARA ESTUDIANTES DE SECUNDARIA

Nuestra Metodología

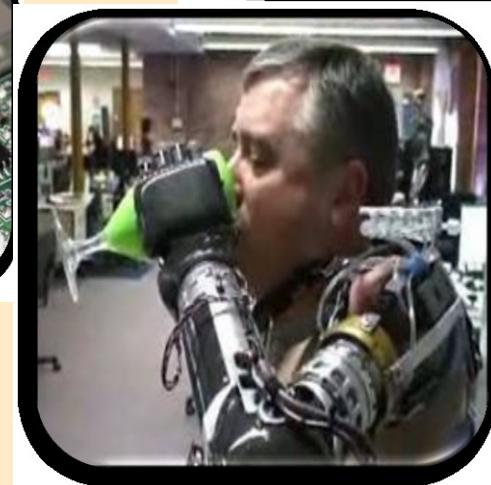

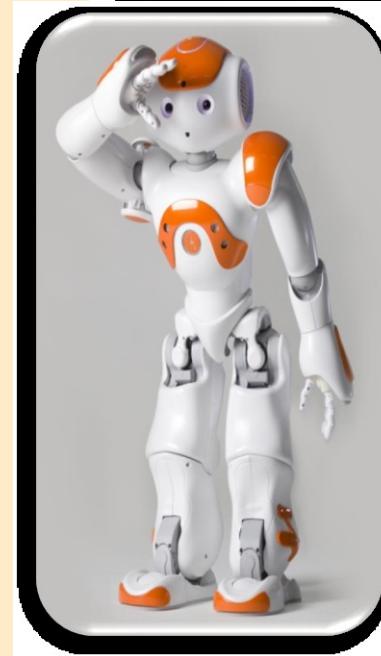

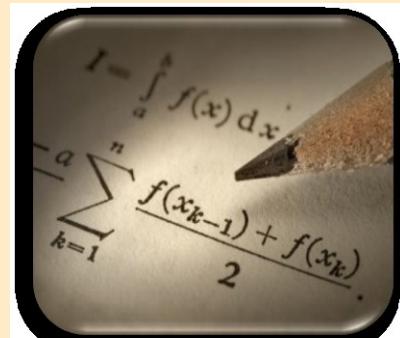

- ❖ Todo experiencia es importante
- ❖ Nada es seguro, todo cambia con el paso del tiempo
- ❖ El futuro esta en el cambio de nosotros mismos
- ❖ Hagamos cultura, fortalecemos nuestro pasado
- ❖ Equilibrio vital: cuerpo, mente y alma

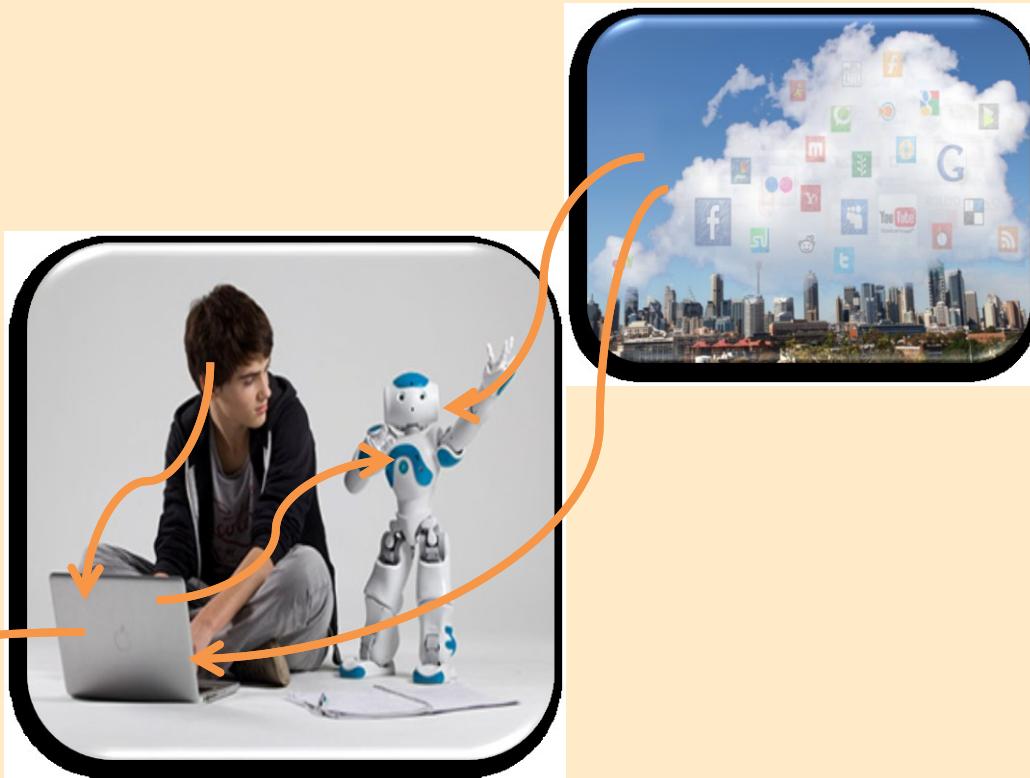

PROYECTO INGENIERO JOVEN

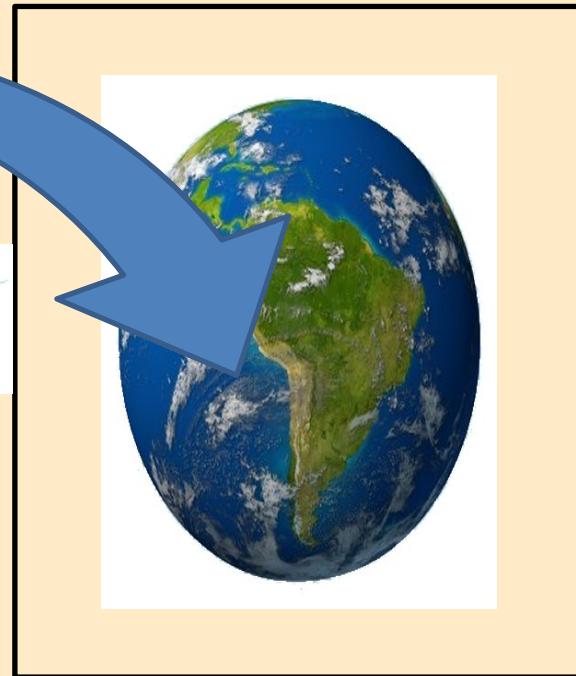

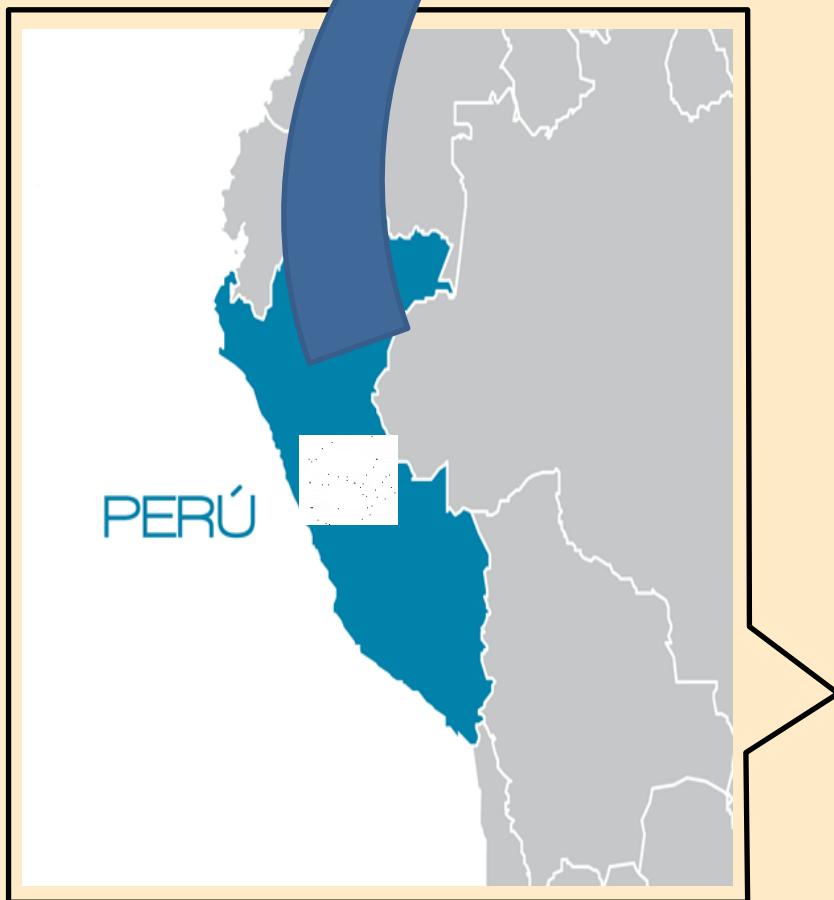

- ❖ Aplicar los conocimientos en matemática y ciencias naturales aprendidos en el colegio diseñando proyectos de automatización
- ❖ Preparación para concursos nacionales e internacionales en ciencia y tecnología
- ❖ Tener conocimientos previos de herramientas que usaran en futuras carreras universitarias

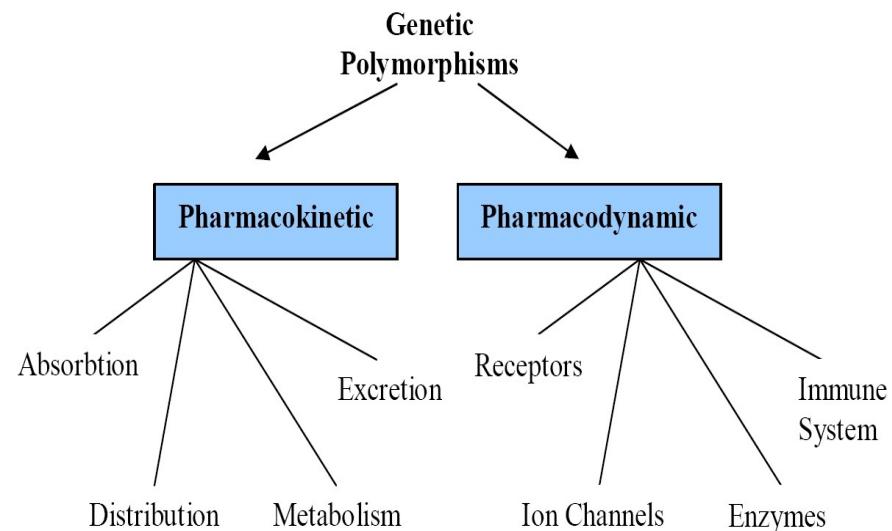

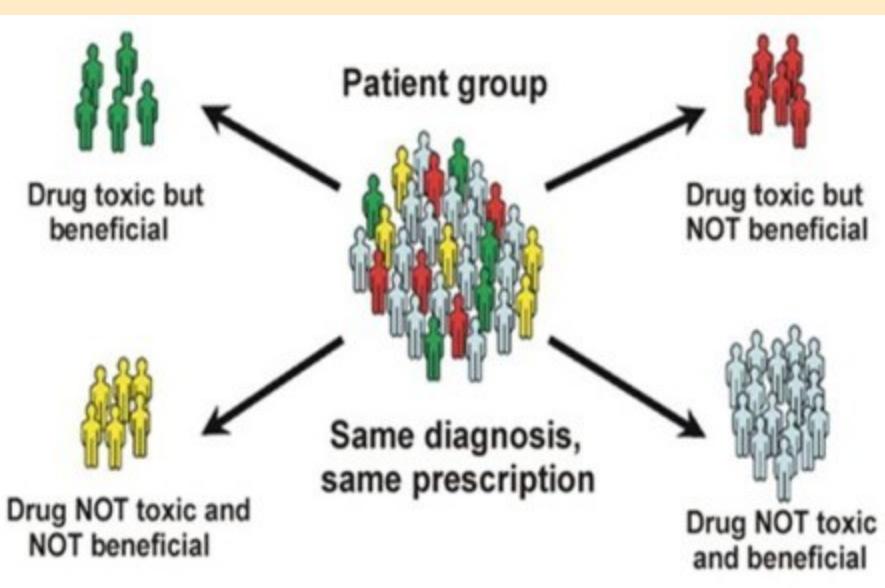

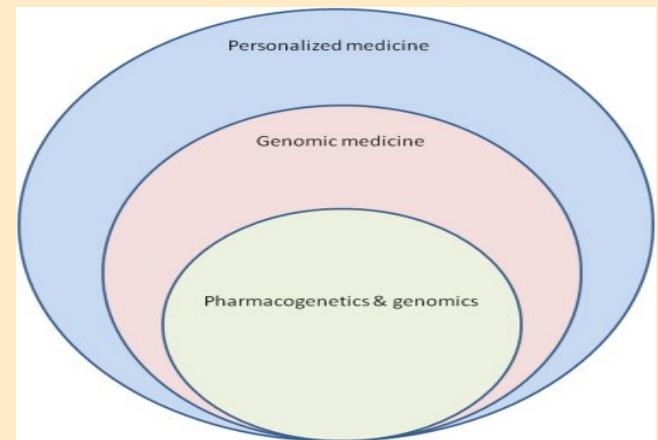

PROYECTO INGENIERO JOVEN

Pharmacogenomics : leading to personalized medicines

In pharmacogenomics, genomic information is used to study individual responses to drugs

Genetic variability leading to susceptibility to adverse drug reactions can affect both pharmacokinetic and pharmacodynamic pathways.
